

EasyP2P.in — The Future of Simple & Secure USDT Exchange

A Transparent Peer-to-Peer Platform for Instant Crypto Transactions

Founder: **Munesh Ojha**

Website: **<https://easyp2p.in>**

Executive Summary

EasyP2P.in is designed to solve one of the biggest issues faced by crypto traders — the fear of bank account freezes and fake complaints when trading USDT via P2P. Our model eliminates middlemen and ensures direct, secure transactions between the platform and users. EasyP2P offers seamless 24x7 liquidity, allowing users to buy or sell USDT without worrying about bank restrictions or delayed payments.

The Problem

Traditional P2P exchanges often rely on third-party users to complete transactions. This creates a high risk of fake complaints, bank freezes, and blocked transfers. As regulations tighten, traders find it increasingly difficult to buy and sell USDT through safe, compliant channels.

The EasyP2P Solution

EasyP2P introduces a new model — we directly buy and sell USDT to users. This removes middlemen entirely, reducing risks and ensuring instant transactions. Our tier-based system ensures compliance and security while allowing users to upgrade limits based on KYC verification following AMLA guidelines.

Platform Features

- Instant buy/sell with live price flash
- No hidden fees, no GST, no TDS
- Tier-based limits with automatic upgrades after KYC
- Direct transactions (no third party)
- 24x7 liquidity and instant settlements
- Easy UPI and bank transfer support

Revenue Model

EasyP2P operates purely on a price-gap model. The difference between buy and sell rates forms our profit. There are no separate trading fees, commissions, or hidden deductions. What you see on the rate screen is the final rate.

Security & Compliance

EasyP2P follows AMLA standards with tier-based KYC verification. Since the platform directly interacts with users, there is no risk of third-party scams or fake complaints. All transactions are securely processed, ensuring both compliance and peace of mind.

Liquidity & Reliability

EasyP2P is backed by reputed financial backers who ensure deep liquidity and constant fund availability. The exchange operates 24x7, providing instant and reliable services to traders across India.

Roadmap

- Mid-2026: Offices in Mumbai & Delhi
- End-2026: Launch of EasyP2P Mobile App
- 2027+: Expansion to multi-crypto and international markets

Vision & Mission

Vision: To become India's most trusted and effortless crypto P2P platform.

Mission: To simplify USDT trading by providing transparency, safety, and efficiency.

Founder

Munesh Ojha, Founder & CEO of EasyP2P.in, is a visionary entrepreneur dedicated to creating a seamless, transparent, and trusted digital asset trading experience in India.
